Introducing Cosmic Cream

New - Performing - Elegant

Cosmic Cream is a fine grained, carbonatic, sedimentary natural rock.

The petrographic name of the material is Bio-Micrite.

The overall color of the rock is classifiable as very pale orange
(10 YR 8/2 of the Munsell's Rock-Color Chart).

The color is given mainly by the micritic matrix.

Cosmic Cream is extremely performing, it can be used successfully as
durable indoor and outdoor surface or cladding.

Cosmic Cream is an exclusive material Palazzo Morelli.

Technical Information

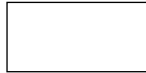

Test description	Score
Water absorption	% 0.66
Flexural strength	MPa 12.33
Abrasion resistance	mm 23.50
Apparent density	Kg/m ³ 2,651.92
Porosity	% 2.60

Cosmic Cream is a natural stone resistant to salt attack.

Cosmic Cream Tile Sizes

mm 600 × 300

mm 800 × 400

mm 400 × 400

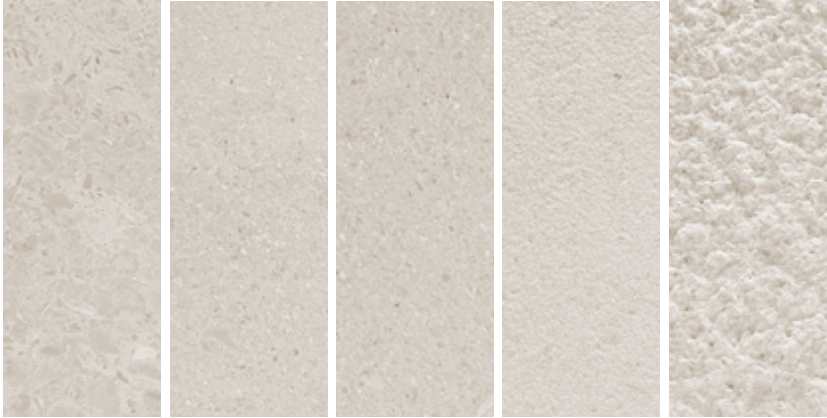

mm 600 × 600

Thickness mm 20

Non-standard sizes are available on request.

Cosmic Cream is a natural stone suitable for indoor
and outdoor areas.
